Watermark on back of sheet

"All conductor and dissipative items in the environment, including personnel, shall be bonded or electrically connected to a known ground or common connection point. This connection results in a sharing to charge which equalizes the voltage across all items and personnel and eliminates the chances of an ESD event to ESD sensitive devices" [CLC/TR 61340-5-2 User guide Clause 4.4 Grounding/bonding systems]

"All non-essential insulators and items (plastic and paper), such as coffee cup, food wrappers and personal items shall be removed from the workstation or any operation where unprotected ESD are handled" [EN 61340-5-1 Clause 5.3.4.2 Insulators]
